# Massachusetts General Hospital

Q1 2012

## Massachusetts General Hospital to expand relationship with Agfa HealthCare.

Imaging clinical information system supports the research and informed decision support needs of MGH.

IMPAX PACS provides flexible architecture and open APIs to foster communication and more informed patient care.

Integrated Agfa HealthCare solutions will help support significant imaging demands of facility's 145 modalities throughout the system.

# South Tees hospitals - NHS

Q1 2012

**South Tees hospitals signs seven-year deal with Agfa HealthCare.**  
Fully integrated IMPAX solution supports both radiology and cardiology.  
IMPAX Business Intelligence to optimise the use of clinical, business, and administrative data to enhance efficiency.

# Cardiff and Vale UHB

Q1 2012

**Cardiff and Vale extends contract with Agfa HealthCare, increasing performance whilst reducing costs.**

New contract delivers a complete technical refresh delivering 30% cost saving per annum whilst making over 10 year's image data available to users in less than 2 seconds.

# HDIRS - Ontario

Q1 2012

**Agfa HealthCare successfully connects 37 healthcare facilities across Ontario to increase information access and enhance patient care.**

Hospital Diagnostic Imaging Repository Services (HDIRS) member facilities now able to view more than 7 million exams through the use of Agfa HealthCare's IMPAX Data Center and enterprise viewing technologies.

**Novation**<sup>®</sup>

## **Agfa HealthCare awarded new contract with Novation for computed radiography.**

Agfa HealthCare has been awarded a new three-year contract with Novation, a leading healthcare supply contracting company, to provide computed radiography systems to more than 65,000 VHA, UHC and Provista member and affiliate organizations in the U.S., that can select from the wide range of high-quality computed radiography (CR) imaging systems from Agfa HealthCare based on their specific throughput and imaging needs.

# Solution as a Service

Q2 2012

**New off-site managed services project for the Orbis Medical Center in Sittard-Geleen, the Netherlands, covers IMPAX PACS/RIS and image archiving**

- Agfa HealthCare provides off-site hosting of IMPAX PACS/RIS 24/7/365.
- 'Triangle' configuration of data lines between hospital and two Agfa HealthCare data centers ensures redundancy.
- Solution as a Service allows customer to benefit from functionalities without capital expenditure.

# Agfa HE opens state-of-the-art worldwide R&D facility

Q2 2012

**Local officials, leaders in healthcare join Agfa HealthCare leaders to commemorate opening.**

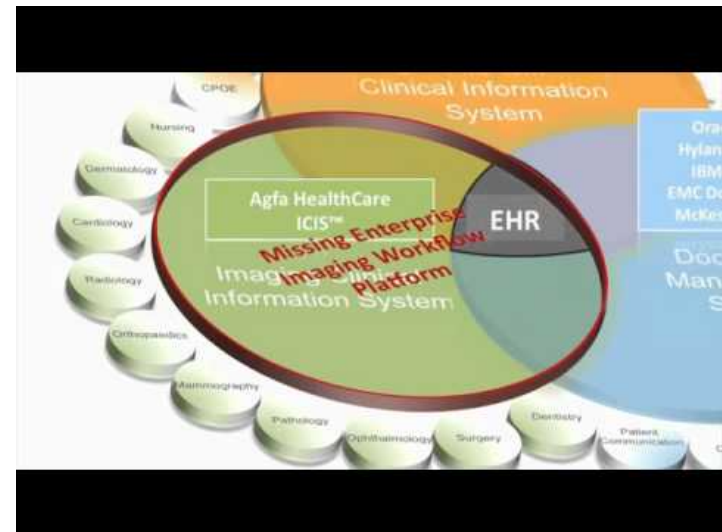

- Facility is a center of excellence for the design of innovative solutions that will bring further revolutionary developments for radiology, pathology and healthcare delivery as a whole to image-enable the HER.
- Strategically located in high tech region of Waterloo, Ontario, leveraging the area's combination of advanced technological and academic resources - Noted local and international officials attend celebration, emphasizing the significance of Agfa HealthCare's contribution to continued innovation for healthcare, today and into the future.

# Agfa HealthCare and Dell form strategic alliance for cloud-based image management solution for the U.S. market

Q2 2012

Agfa HealthCare extends managed services platform to cloud host ICIS - its Imaging Clinical Information System – and enable facilities in the U.S. to image-enable their EMR

# Agfa HealthCare awarded new three-year contract by Premier healthcare alliance

Q3 2012

## Entire line up of current DR products available on contract to Premier members

- Contract accessible to 2,600 Premier member hospitals and 84,000 alternative healthcare sites.
- Premier members can select from comprehensive line of Agfa HE DR systems, all with the renowned MUSICA2 image processing software.
- Latest contract in 17-year history of Agfa HealthCare and Premier agreements.

# Shrewsbury and Telford extends with Agfa HealthCare

Q3 2012

**Contract extension upgrades existing Agfa HealthCare PACS, trials mobile DR and replaces CR**

- Contract extension sees PACS service improvement and easier access to images whilst providing better access to clinical applications
- DR mobiles enhance the clinical workflow allowing instant high-quality image capture on the ward which can be seen immediately on the PACS system
- Eight CR units replaced throughout the Trust including three at community hospitals

# Agfa HealthCare and Orion Health form global strategic relationship for e-Health

Q3 2012

**Jointly deliver proven image enabled longitudinal patient record for EHR/HIE and HIS/CIS/EPR strategies**

- Companies team up, combining their enterprise imaging and EHR/HIE expertise, to provide cost-effective health record consolidation and exchange across enterprises.
- The combined solution creates workflow efficiencies, providing images in context with patient information, and delivering more comprehensive information for care decisions.

# Agfa HealthCare awarded new contract by HealthTrust Purchasing Group

Q4 2012

**Entire line up of current DR systems available to HealthTrust's member organizations**

- Contract covers HealthTrust's 1,400 not-for-profit and for-profit acute care facilities.

- Agfa HealthCare also has contracts with HealthTrust for CR solutions and medical film and imagers.

# Pediatric patients at Children's Mercy Hospitals and Clinics benefit from nearly 60% dose reduction compared to previous system

Q4 2012

**Agfa HealthCare's DX-G CR solution meets quality demands for pediatric care and delivers potential for a significant reduction in radiation dose.**

- Children's Mercy chooses Agfa HE CR system for its pediatric & neonatal digital radiography needs, including 10,000 neonatal chest X-rays/year.
- The DX-G system provides high-quality imaging results with the hospital experiencing a reduction in radiation dose of 57 percent.
- Agfa HealthCare's solution meets the hospital's requirements both for safety and high throughput, improving the delivery of patient care, productivity and wait times.

# Agfa HealthCare signs deal with Maxisima Medisch Centrum

Q4 2012

## IMPAX solution covering radiology, cardiology and nuclear medicine.

- Agreement includes 10-year Managed Services contract providing continuously upgraded systems and minimum downtime.
- Agfa HealthCare selected after very competitive tender.
- Solution is a step towards hospital-wide PACS and integration with other hospitals.

# Agfa HealthCare extends portable DR reach to Bethesda healthcare system

Q4 2012

## Bethesda Hospital East adds multiple DX-D 100 systems for image quality, flexibility and workflow gains

- Agfa HealthCare's DX-D 100 mobile DR solution enables Florida hospital to provide consistent, high DR image quality regardless of exam location.
- Hospital technologists benefit from improved X-ray exam productivity and ease of system maneuverability.
- MUSICA2 image processing helps produce images that exceed facility's quality expectations.

# The Royal Bournemouth and Christchurch Hospitals upgrade to Agfa HE's next generation image processing

Q4 2012

*Putting patients first*

**New CR 30-X and DX-G digitizers increase patient throughput and image resolution**

- Excellent image quality and smoother, more productive workflow
- Faster image processing
- Allows the Trust to meet increasing service demands whilst delivering high-quality imaging
- Different sized needle phosphor plates offer greater flexibility

# Agfa HE wins competitive tender to implement its latest IMPAX RIS/PACS at Refaja Hospital in the Netherlands

Q4 2012

Refaja Ziekenhuis Stads kanaal

**Fully-integrated digital imaging and information management solution will support hospital in providing top-quality care and service for patients and staff**

- Two-year agreement continues long-term relationship between Agfa HealthCare and Refaja Hospital.
- Benefits for Refaja include smoother workflow, faster results, consolidated patient information, efficient patient turnaround and more.
