# THE ONLY GUIDE YOU'LL EVER NEED

**“** *I will never trust any other company. You guys are the best!* **”**  
– Dr. Hector L. Briceno Winter Garden, FL

# WORLD LEADER IN COMPUTER GUIDED SURGERY

3D Diagnostix started in 2005 as one of the first Guided Surgery service providers.

Foreseeing the growing need for oral maxillofacial 3D reconstructions, we started out supporting Harvard's School of Dental Medicine with their CT scan conversions out of our current HQ in Boston, Massachusetts. Since then, 3DDX has expanded to provide turn-key Guided Surgery solutions such as Implant Treatment Planning, Surgical Guides, Radiology Reports and Implant Planning Software to dental professionals all over the world.

Every day, we at 3DDX work on making Guided Surgery more and more accessible to thousands of dental professionals around the world by putting ease of use, fast turnaround, the highest standards of quality and customer support at the heart of our strategy.

Whether you are new to computer guided surgery or have experience with planning your own cases, we believe you can leverage the 3DDX service portfolio, versatile work flow and years of experience to your patients' benefit as well as your own.

PERFECT SMILE

## 3D CONVERSIONS

Carefully segmented by professionals, our 3D Conversions offer you the highest standards of quality and with a turnaround time of 4 to 6 hours, you won't be waiting long for your cases to be ready.

## TREATMENT PLANNING

Performed by in-house 3DDX dentists who collaborate with you on unlimited, one-on-one, fine-tuning sessions ensuring that you remain the final decision maker for all your cases.

## SURGICAL GUIDES

We understand that no two cases are the same. That's why each and every 3DDX surgical guide is custom made to be compatible with your implants, surgical kit and patient's anatomy. Available with: tooth, mucosa or bone support. You can also order 3DDX bone reduction guides!

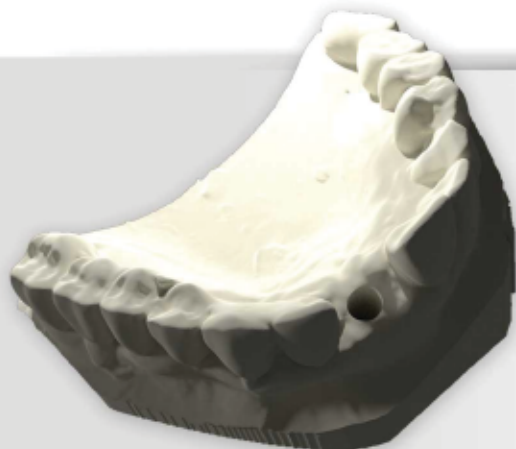

## RADIOLOGY REPORTS

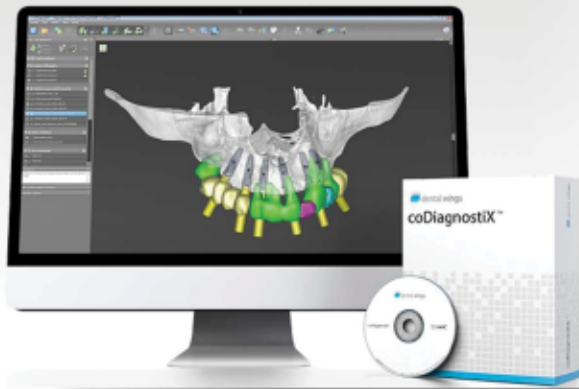

Each and every 3DDX Radiology Report is interpreted and signed by a board certified Oral Maxillofacial Radiologist. Our Radiology Reports are all comprehensive and detailed with images.

## IMPLANT ANALOGUE MODELS

Implant Analogue Models are acrylic models based on your treatment plan that help your lab fabricate gorgeous provisionals so you can give your patients that instant smile! Order Implant Analogue Models with your 3DDX Surgical Guides.

## IMPLANT PLANNING SOFTWARE

Plan your own cases and order 3DDX Surgical Guides at discounted prices. The software comes with full hands-on training by a 3DDX Dentist and 3D glasses for presenting cases to your patients in Real 3D!

## CUSTOMER TESTIMONIALS

“

3D Diagnostix, inc. has saved us time and effort and has enabled us to provide superior diagnostic services to our clients. The number of referrals to our center has steadily increased over the months, due in part to our use of 3DDX.

— Dr. Bernard Friedland, B.Ch.D., MSc., J.D. Head Division of OMR Harvard School of Dental Medicine Boston, MA

“

3D Diagnostix has taken the initiative in filling a quickly increasing and vital need providing clinicians with a means to navigate through the confusing world of CT and CBCT data through their simple yet elegant online interface and their diverse offerings.

— Scott D. Ganz, DMD Prosthodontics, Maxillofacial Prosthetics & Implant Dentistry Fort Lee, NJ

“

At the beginning of my journey 3DDX walked me through every procedure from scanning the patient, to treatment planning, to surgical guide fabrication. Their expertise and excellent service make the process very easy for me. I continue to rely on them to review and refine my treatment plans. Surgeries are much easier and faster since I have incorporated virtual treatment planning and surgical guides from 3D Diagnostix into my practice.

— Dr. Randall K. Warkentin, Boundary Trails Dental Centre, Canada

“

Throughout the process of learning implant placement and the software technology which is now the standard of care for implant placement, 3DDX has been a critical part of that process. I highly recommend their services to any clinician starting out or already proficient with implants. I have never in 30 years been so impressed with a company that is so concerned, pleasant to work with, and so competent in their respective field of expertise.

— Alan Rosenthal, DDS Norwalk, CT

“

Being able to get CT scans converted in less than 24 hours helps me address patient concerns and optimize the planning and placement of dental implants.

— Dr. Ramsey Burton, D.M.D. Periodontist Louisville, KY
